

Educational Program Series—4000

## **LIBRARY SERVICES**

Chemeketa Community College library services exist as a major resource for the college and the community.

The college will endeavor to meet individual needs in a variety of ways:

1. Provide a wide range of materials in support of the college's curriculum outcomes and research needs.
2. Provide materials that will cover several levels of instruction and student ability.
3. Provide enrichment material for community education programs.
4. Provide reference service and facilitate access to material not available locally.
5. Provide Information Literacy instruction to students across the college curriculum.
6. Create procedures and guidelines that facilitate shared use of learning resources owned or managed by the college.
7. Provide appropriate systems, support and technological environments to ensure access to information and enhance the learning experience.
8. Cooperate with other organizations including other member libraries of the Chemeketa Cooperative Regional Library Service and the Orbis Cascade Alliance for more effective utilization of resources.
